Experience

Software Development Coordinator - 2023/2024

VFR Sistemas – São Paulo, Brazil

As a Software Development Coordinator, I lead a team of developers, overseeing project planning, task allocation, and time estimation to ensure timely delivery of high-quality software. In addition to coordinating the team, I actively contribute to coding and development tasks, balancing hands-on programming with strategic planning. I collaborate closely with stakeholders to define requirements, establish timelines, and drive continuous improvement within the team.

Skills: Confluence · Docker · Prisma · Cypress.io · Team Coordination · PostgreSQL · Node.js · Scrum · JIRA · Software Product Management · Angular · TypeScript · SASS · NestJS · Project Coordination

CTO - 2018/2023

Vits Idiomas – São Paulo, Brazil

Responsible for the management, development and implementation of the business, the application, websites and the system, in addition to creating and coordinating the interdisciplinary team.

Skills: HTML · RSpec · TypeScript · Git · React.js · Node.js · SQL · Team Leadership · Software Project Management · Software Documentation · Software Testing · Requirements Engineering · Kanban · Scrum · PostgreSQL · CSS · JavaScript · REST · Ruby on Rails

Full Stack Senior Developer - 2018/2022

CTech – São Paulo, Brazil

Maintenance and development of websites, systems and applications for companies abroad. During this period I provided services to the following companies:

- **Idsclose** (<https://app.idisclose.com/l/packages>)
- **SJN journal** (<https://sjnjournal.com/>)
- **VirtualShield** (<https://virtualshield.com/> | <https://github.com/virtualshield/rails-graphql>)
- **Smart Patients** (<https://www.smartpatients.com/>)
- **It's Check Mate** (<https://itsacheckmate.com/>)
- **JoinLoop** (<https://www.joinloop.com/>)
- **SubHQ** (https://my.subhq.app/users/sign_in)
- **Enjoy** (<https://enjoy.com>)

Skills: HTML · PHPUnit · RSpec · TypeScript · SSH · JQuery · Laravel · Git · React.js · Node.js · SQL · Software Testing · Requirements Engineering · Kanban · Scrum · PHP · PostgreSQL · CSS · JavaScript · AJAX · REST · Ruby on Rails

Development Manager - 2017/2018

Synoro Negócios Inovadores – São Paulo, Brazil

Responsible for project planning, process control, development, team leadership, requirements gathering, application of agile methodologies, software architecture and data modeling for 3 Startups from the Synoro Group, Auditor Axyma, Agrishare and Desquebre.

Skills: HTML · TypeScript · SSH · JQuery · CodeIgniter · Git · Node.js · SQL · Team Leadership · Software Project Management · Requirements Engineering · Kanban · Scrum · PHP · CSS · JavaScript · Ionic Framework · Firebase · AngularJS

Full Stack Developer - 2011/2017

Mauá Institute of Technology – São Caetano do Sul, Brazil

During this period, I worked on the development, in PHP, of the Eureka systems (management of all student work, purchase of materials, approval, financial control, inventory, management of dates and organization of the Eureka event, exhibition of the institution's course completion works), Mauá Projects (management and organization of documents, surveys, budgets,

participants, deadlines and meetings in ongoing projects at the institute) and the Mauá Purchase System (ERP with forecasting, requesting, approval, separation for purchase and generation of institution's purchase order reports).

I was responsible for the development of the Mauá Retroreflectivity application, having its initial version in Ruby and later in Android, for technical measurements on highways and the website of the Forum of ABCD leaders.

Also responsible for the entrance control system for the institution's concierge.

Skills: HTML · Android · SSH · JQuery · Laravel · SQL · Team Leadership · Software Documentation · Requirements Engineering · Scrum · PHP · PostgreSQL · CSS · JavaScript · AJAX · XML · SOAP

Freelancer - 2008/2022

Sapia Softwares – São Paulo, Brasil

2022 - Website developed for Fairplay company (fairplaysoccer.com.br/)

2015 - Website developed for Makeart arts company (www.makeart.com.br).

2011 - Developed an internal system for the Podologia Natureza dos Pés office (patient schedule and product sales, account control, inventory and reporting).

2010 - I participated in the development of the Danúbio Seguros website (www.danubiosegueros.com.br) and Prof. Silvio Bauco.

2008/2009 - Creation of websites and simple layouts in HTML/CSS/JavaScript.
